

About "Customized Bags"

When it comes to the creations of bag and leather goods, it is the most satisfying day for both you and me. The process takes a minimum of 2-3 months and can extend up to 8 months. The cloud team dedicates this time to present the best luxury bag creations directly to you.

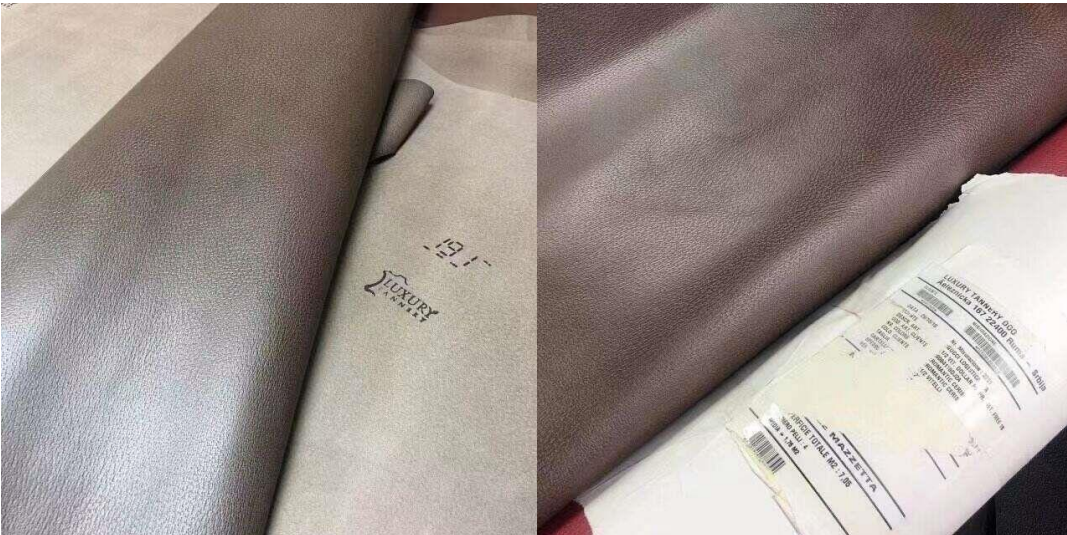

(The cost of purchasing the original version of the bags and initiating the production process has exceeded 7 million RMB, excluding the customization of imported Italian factory leather, hardware, accessories, and various aspects, all meticulously refined for perfection)

(Due to the large quantity, I won't post pictures one by one)

Each bag and leather accessory is crafted from original leather, all of which are imported from Italy. The arrival time of foreign leather is uncertain due to its special channel sourcing. Consequently, occasional shortages and restocking situations may occur for certain classic and popular styles.

Using specific styles as examples to illustrate the leather:

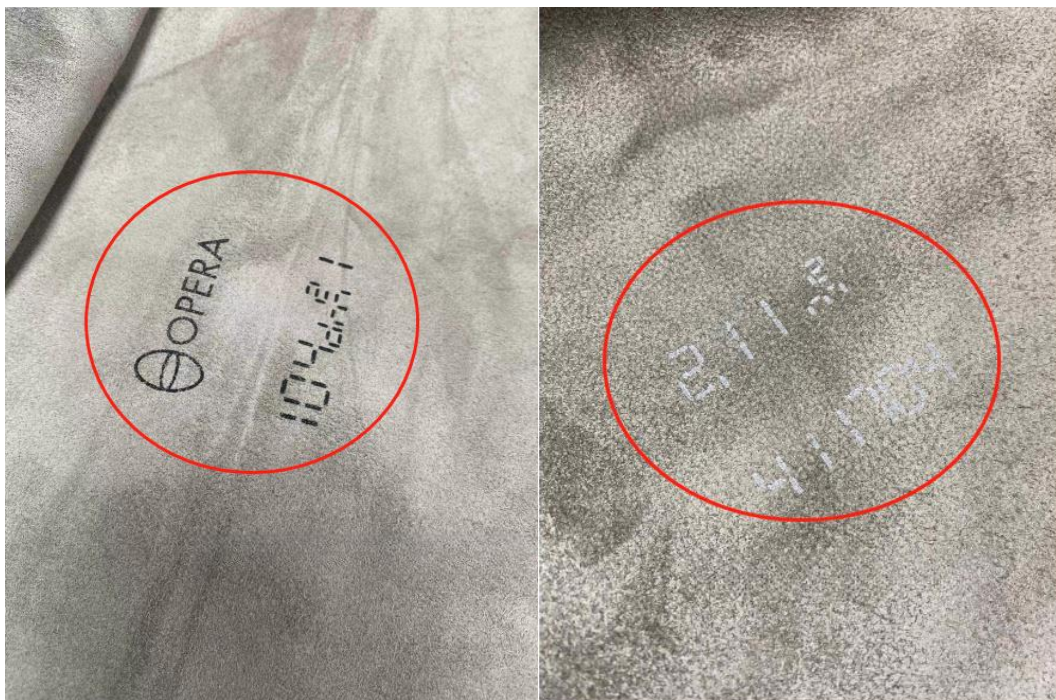

Procuring a large quantity of leather
Every time before placing an order, we need the foreign suppliers
to provide us with photos of both the exterior and interior
materials of the leather.

The marking of the leather imported from the original Italian factory.

Imported mature bullhide (taken from the neck area of the bull) with a surface resembling lychee grain, featuring evenly arranged small particles of various sizes. When touched, it feels thick and substantial, and it has a glossy and warm luster. It's almost halfway through the forming process before realizing the need to capture some materials.

The Italian factory-imported leather is ready; now it's time to prepare the accessories.

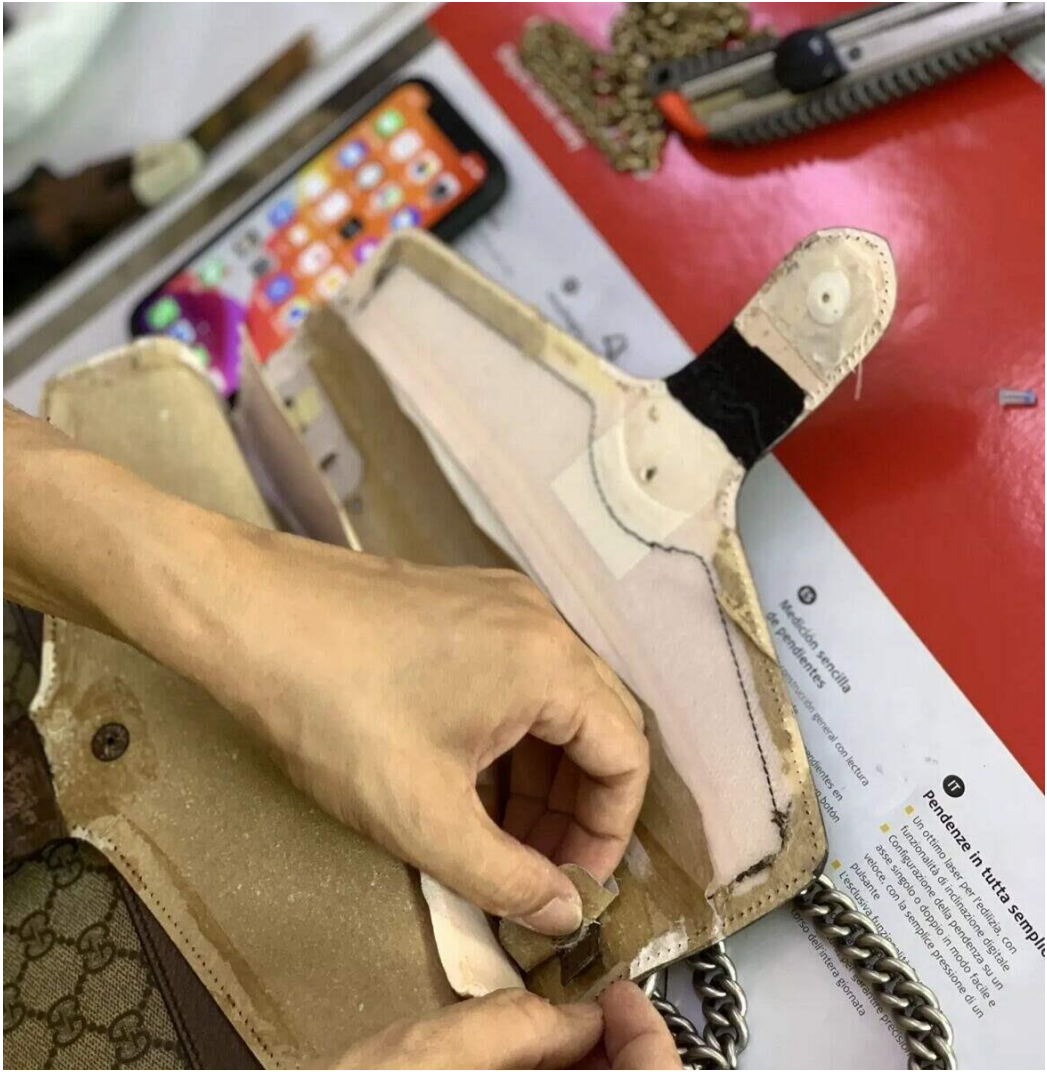

Working hand in hand with craftsmen with a decade of experience to ensure perfection in every bag, leaving no detail overlooked. Disassembling the genuine original to understand its intricacies.

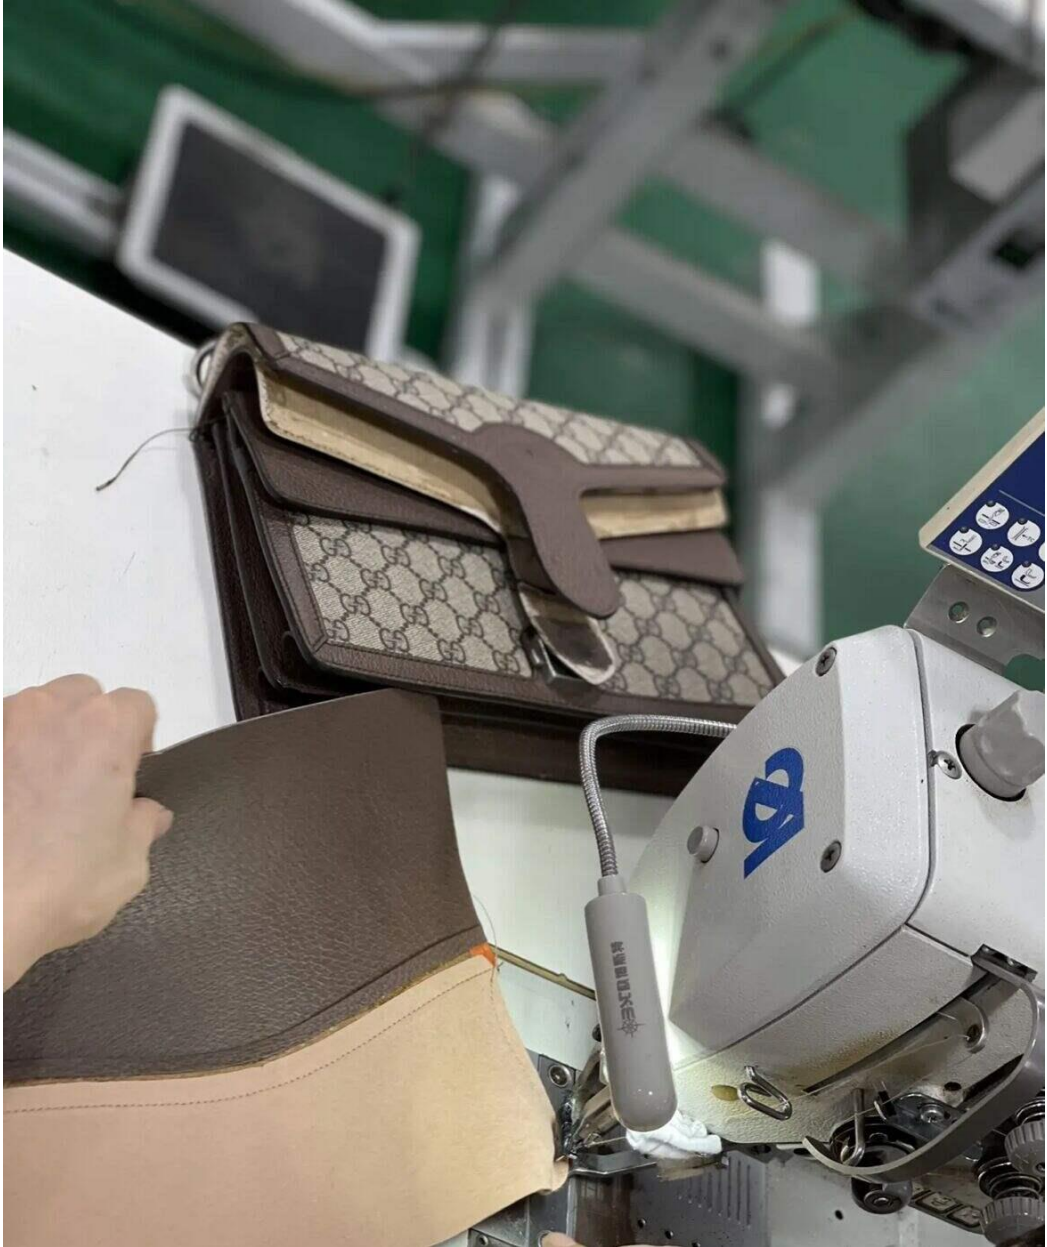

The process involves on-site collaboration with the craftsmen, meticulously refining every detail during the sample-making.

Comprehensive communication across multiple factories, focusing on details, all for the creation of exclusive quality. In summary: Repeat simple tasks, do repetitive tasks with care, persist in doing tasks with dedication, and stay true to the original intention. With perseverance and unwavering commitment, we strive to give back the best quality to our partners who support our cloud team.
